Carrer Objective

MERN Stack Developer with hands-on experience building responsive web applications using React, Node.js, Express.js, MongoDB, and Firebase. Passionate about writing clean, efficient code and delivering scalable solutions. Ready to contribute to innovative projects and collaborate with development teams to create impactful user experiences.

Skills

Frontend: JavaScript, React, React Router, HTML5, CSS3, Tailwind CSS, Daisy UI.

Backend: Express.js, MongoDB, Firebase Authentication

Other: Responsive Design, Git & GitHub

Soft Skills: Hard working, Quick learner, Active listening, Teamwork, Responsibility, Management, Leadership, Adaptability, Critical Analysis etc.

Projects

Bashabari – Real Estate Web Application:

[Live Link](#) | [Client Site](#) | [Server Site](#)

Overview: Bashabari is a real estate platform that connects users, agents, and admin to facilitate seamless property browsing, listing, and buying. Users can wishlist, review, and make offers on properties. Agents manage properties and offer; admins oversee the platform, including verification, user roles, and reviews.

Key Features:

- **Role-Based Dashboards** for Admin, Agent, and User
- **Dynamic Property Listing & Detail Pages** with wishlist and review features
- **Advertisement Section** powered by admin-selected properties

Technologies Used: HTML5, CSS3, JavaScript, React, React Router, Tailwind CSS, DaisyUI, Firebase Authentication, Mongodb, Express.js

MarathonHub – Marathon Management web site:

[Live Link](#) | [GitHub](#)

Overview: MarathonHub is a comprehensive web application designed for marathon enthusiasts to discover, register for, and manage marathon events easily. Whether you're a casual runner or a professional athlete, MarathonHub offers an intuitive platform to keep track of upcoming marathons, registration deadlines, and personal race schedules all in one place.

Key Features:

- **Event Discovery:** Browse and filter marathons with detailed event info.
- **User Authentication:** Secure login and registration using Firebase Authentication.
- **Easy Registration:** Secure registration with personalized forms and auto-filled user info.
- **User Dashboard:** Track your registered marathons, application status, and race schedules.

Technologies Used: HTML5, CSS3, JavaScript, React, React Router, Tailwind CSS, DaisyUI, Axios, Express.js, MongoDB, Firebase Authentication, Node.js

TastLog – Recipe Management Web Application:

[Live Link](#) | [Client Site](#) | [Server Site](#)

Overview: TastLog is a modern, responsive Recipe Management web application where users can easily add, update, delete, and explore recipes. It simplifies recipe sharing and discovery through an intuitive user interface.

Key Features:

- **User Authentication:** Secure login and registration using Firebase Authentication.
- **Recipe Management:** Add, edit, delete, and browse personal or shared recipes.
- **Recipe Discovery:** Filter and view recipes by categories or cuisines.

Technologies Used: HTML5, CSS3, JavaScript, React, React Router, Tailwind CSS, DaisyUI, Firebase Authentication
